SUMMARY

Computing student with hands-on experience in HTML, CSS, JavaScript, Python, and Git/GitHub. Combines software development capabilities with 7+ years of professional experience in data management, client operations, and process improvement. Focused on building responsive web applications, solving complex technical problems, and delivering clean, structured code in entry-level technology or business analysis roles.

PROJECTS

Personal Digital Portfolio, *Live Site: jordaineforde.github.io/portfolio-website*

Technologies: HTML5, CSS3, JavaScript, Git, GitHub Pages

- Designed and built a custom, responsive multi-page web portfolio featuring interactive UI components.
- Utilised Git version control via VS Code terminal to manage commits and automated deployment.

Python Jukebox GUI Application, *Live site: <https://github.com/jordaineforde/jukebox-app>*

Technologies: Python, Tkinter, OOP

- Built an interactive desktop music player application in Python using Tkinter for the GUI.
- Applied Object-Oriented Programming (OOP) to manage track libraries and dynamic playlists.

University Open Day Management Platform, *(Systems Analysis & Design)*

Methodologies & Tools: Agile (Scrum), Business Analysis, UML (Sequence & Use Case Diagrams), Lucidchart

- Led requirements analysis across 5 stakeholder groups to define solutions for manual legacy processes.
- Mapped 'As-Is' vs 'To-Be' business workflows using UML diagrams to optimise scheduling processes.

TECHNICAL SKILLS

Languages & Front-End: HTML5, CSS3, JavaScript (ES6+), Python

Tools & Platforms: Git, GitHub, GitHub Pages, VS Code, Microsoft Office, Notion, CRM Tools

Development Practices: Object-Oriented Programming (OOP), Version Control, Responsive Web Design, GUI Development

Data & Analytics: Data Governance, Database Management, Spreadsheet Analysis, Digital Analytics & SEO

Professional Skills: Problem Solving, Stakeholder Communication, Process Optimisation, Client Relationship Management

EDUCATION

BSc (Hons) Computing AI, *University of Greenwich*

2025 – Present

Relevant Modules: Computer Systems and Internet Technologies, Object-Oriented Programming, Software Engineering

Fundamentals of Digital Marketing, *Google Digital Garage*

2023

PROFESSIONAL EXPERIENCE

Blog Writer, *Every Little Step*

2023 – Present

- Maintain website content, layout consistency, and apply SEO principles to improve visibility

Team Supervisor & Operations,

2018 – 2024

Bar Brothers / Simmons / Waterfront

- Supervised high-volume team operations, managed stock inventory databases, and handled financial reconciliation.

Digital Media Assistant, *Bl-nk/Trieu Nails London*

2016 – 2018

- Maintained customer databases and inventory spreadsheets, achieving a 95% satisfaction rating.
